

# Wireline Capsule Gun Accessories

## TOP SUB PART NUMBERS

Gun Size (in)[mm]	Top Sub	Cap Screw	Nut
1-11/16 [43]	0215-168-001	BHCS-0037-24-0075	0215-000-004
2-1/8 [54]	0215-212-001	BHCS-0037-24-0075	0215-000-004

## TANDEM ADAPTER PART NUMBERS

Gun Size (in)[mm]	1	2	3	4
	Tandem Adapter	Det Cord Clip	Screw	Cap Screw
1-11/16 [43]	0215-000-002	0215-000-005	SCR-BHS-ST-10-32-0.25	0215-000-003
2-1/8 [54]				

## GUN BOTTOM PART NUMBERS

Gun Size (in)[mm]	Gun Bottom	Cap Screw	Nut
1-11/16 [43]	0215-168-003	0215-000-003	0215-000-004
2-1/8 [54]	0215-212-003	0215-000-003	0215-000-004

## MISCELLANEOUS ACCESSORIES

Due to the geometry and weight distribution of long capsule gun strings, the charge strips tend to flex and twist as it is run in hole. This can affect the performance of the shaped charges and hinder the retrieval of the gun string. Rollover sleeves help stabilize and line up the charge strip correctly to optimize gun performance and hardware survivability.

Gun Size (in)[mm]	Part Number
1-11/16 [43]	0215-168-006
2-1/8 [54]	0215-212-006

The loading socket assembly allows the capsule gun shaped charges to be lined up correctly such that detonating cord can be easily fed through. It also reduces the possibility of damaging the detonating cord as it contracts when exposed to downhole conditions.

Gun Size (in)[mm]	Part Number
1-11/16 [43]	0215-168-010
2-1/8 [54]	0215-212-010

Detonating cord retainers are used to secure detonating cord onto the charge strip in areas where there are no shaped charges. This ensures no detonating cord is floating allowing it to be prone to damage.

**Part Number: 0215-000-008**

Detonating cord clips secure the detonating cord onto the shaped charges and detonating cord retainers. They come included with the shaped charges but can be ordered separately.

**Part Number: 24-1688-001**
