

## Piping, Cross-over and Instrumentation Packages Well Testing

### Features

- Dedicated and experienced well test equipment fabrication service
- Certification and Testing according PED 97/23/EC / ASME B31.3 / NACE

### Benefits

- On-time delivery reducing operational impact
- High quality fabrication up to the latest industry standards

**Well Testing, frac flowback and clean-up operations both offshore and onshore need customised piping, cross-over and instrumentation packages to be professionally fabricated, often at very short notice, where any delay has a potentially high impact on the cost of the operation and reputation of the well testing service provider.**

Building on more than 30 years industry experience, Hunting has managed the inventory of critical components, such as pipe connectors, and developed in-house skills in welding and fabrication to establish a reputation for outstanding on-time delivery for this niche service.

Hunting can provide a wide range of packages according to the customer's requirements including Certification and Testing in accordance with PED 97/23/EC / ASME B31.3 / NACE. DNV-OS-E101.

### Piping Packages

#### Configurations

- Flow-Lines
- Elbows
- Cross-Overs
- Data Headers
- Tee's
- Y-Pieces
- Instrument Flanges
- Cross-blocks
- Test Caps

#### Connectors

- API & ASTM Flanges
- API Hubs
- Grayloc & Vector Hubs
- FMC & Anson Hammer Union from Fig 206 to 2202

#### Supplies

- Gaskets
- Seal Rings
- Stud-bolts
- API Clampsets
- Grayloc & Vector Clampsets
- Protectors

### Crossover Packages

Any combination of the connectors and more

### Instrumentation Packages

- Pressure Gauges
- Temperature Gauges
- Needle Valves
- Block and Bleed
