

Otis® W Running Tool

Slickline Downhole Tools

The Otis W Running Tool sets the types C, B and W Slip type Otis mandrels in the tubing.

The Otis W running tool consists of a top sub complete with fishing neck and sucker rod pin connection, a middle sub, a bottom sub, a collet set and an inner core.

When the desired setting depth has been reached, the tools are picked up to set the slips and expand the rubber element. Once set, the pin in the W running tool can be sheared, the prong can be withdrawn from behind the collet, allowing the running tool to release from the mandrel.

Hunting W Running Tools are available with various connections to suit customer requirements

OTIS® W® RUNNING TOOL					
Used to Run	Nominal Size	Maximum Size (OD)	Fishing Neck on Tool	Fishing Neck Will Engage	Connection
Type B, C and W Mandrels	1.250"	1.190"	1.000"	0.531"	5/8" 11 UN
	1.500" to 1.750"	1.380"	1.187"	0.687"	15/16" 10 UN
	2.000"	1.500"	1.375"	0.812"	15/16" 10 UN
	2.500"	1.500"	1.375"	1.000"	15/16" 10 UN
	3.000"	2.250"	1.750"	2.000"	1 1/16" 10 UN
	3.500"	2.620"	2.313"	1.875"	1 1/16" 10 UN
	4.000"	3.500"	2.313"	2.812"	1 1/16" 10 UN

Spares components are available. Please specify part and assembly part number or part number if known.
