

Slickline Tool Connections

Slickline Downhole Tools

Features

- Quick Lock sizes for all sized applications
- Common threaded connections

Hunting offers different Slickline tool connections to fit the customer requirements.

Standard Sucker Rod threaded connections

QLS Quick Lock System ¹

HDQRJ Heavy Duty Quick Lock ¹

Halliburton Quick Connect ²

Sucker Rod threaded connections are standard through the industry and have been in use for many decades

QLS was the original quick connect design for slickline tools.

Hunting offers all sizes of QLS connections.

HDQRJ is a Heavy Duty quick connect used for more robust applications and is available in 3 connection sizes.

Halliburton (OTIS®) quick connect is offered in all 4 sizes.

In addition to the slickline connections selected by customers, Go/No-Go gauges for Sucker Rod types. wear gauges for QLS and Check Gauges for HDQRJ connectors are available.

Crossovers and adapters allowing greater versatility with Hunting's extensive line of slickline, e-line and other similar tools are also available.

² = HQC is built to Halliburton design.
