

Lightweight Wireline Valve

Wireline Pressure Control Equipment

Features

- New lightweight design - Over 50% reduction in weight
- Lightweight cylinders <24kg
- Ezi-Close balanced piston design hydraulic cylinders
- Simple Manual closure under all conditions
- Robust contoured forged monoblock body

Benefits

- Improved handling, transportation and serviceability
- Quick and simple redress with improved handling and reduced human exposure
- Ezi-Close delivers quick ram closure under wellbore pressure
- Ezi-Close allows manual closing of rams against wellbore pressure
- Reduced leak paths

The Hunting Lightweight Wireline Valve is designed to offer improved handling, ease of serviceability and with fewer parts.

Utilising the Hunting balanced piston Ezi-Close hydraulic cylinders, the valve allows rapid closure with standard accumulator type control panels. Additionally, the Ezi-Close cylinders allow manual closure under pressurised wellbore conditions.
